

Improving your Performance

North West
Leadership Academy

“The North West Leadership Academy commissioned a series of Aspiring Director Leadership Programmes of which Frontline as part of a Consortium played a key role in the design and delivery. Frontline successfully delivered two key leadership modules within these programmes – Leading Strategy and Innovation and Leading Performance – which were well received with excellent feedback on their performance.”

Programme Manager
NHS North West Leadership Academy

“Frontline provided expert strategy advice and facilitation to the trust in the development of its strategy. This independent contribution challenged trust thinking and focused on strategic options that maximised trust resources, building on robust analysis of the trust’s performance and market position. The strategy paper prepared jointly with trust staff was very well received by the board.”

“Frontline provided a high quality and much valued support to the 30 AHP services via the AHP Service Improvement Project. Working closely with the DH project team, they responded quickly and pragmatically to the demands within a tight timescale and brought forward some innovations and partnerships that added value to process and outcomes. Their attention to detail and to the relationship building to support clinical leaders has been an important factor in the success of the project.”

Allied Health Professions Officer
Department of Health

“We used Frontline because we had previously seen them at first hand delivering work in a sensitive way but still dealing with difficult circumstances. We were not let down and Frontline gave us a report we could use. The great positive for us was that Frontline broached all the difficult issues for us in a workshop and made recommendations which after that seemed pretty obvious. We still had to make tough decisions but the path was made clear in the report.”
